

Language and Society

Assignment - 5

You have been given a set of 50 code-mixed sentences of languages Eng-Hin. You are required to identify the matrix language and embedded language, approx. percentage of code-mixing. You are also required to write in about 100-200 words your general observations reg. POS from where this code-mixing takes place and present conjectures as to why these happen. (For those who do not understand Hindi are free to collect their own 50 sentences and carry out the same activity as described above)
